Full-Stack Web Developer with a drive to combine web development skills with professional expertise in project management, technical writing and editing, and customer satisfaction. Experienced creative problem-solver with an insatiable curiosity and a wide variety of knowledge bases. Adept at scouring available resources to quickly gain new skills and knowledge that are required to solve the challenge at hand. Background in English Literature, the architecture and construction industry, writing technical training documentation, and office administration.

TECHNICAL SKILLS

- HTML5, CSS3
- JavaScript, jQuery
- React.js, Redux
- Bootstrap, Materialize, PureCSS, Handlebars
- Responsive Web Design
- Google Firebase, Amazon Web Services, MySQL, Sequelize, MongoDB, mLab
- Node.js, Express.js
- RESTful APIs, Ajax
- CLI, Git Bash
- MVC and OOCSS programming paradigms

APPLICATIONS BUILT

goodDeeds: <https://good-deed-s.herokuapp.com/>

- A full-stack MongoDB, Express, React, and Node.js (MERN) app designed to directly connect skilled volunteers with people in need
- User authentication using Passport.js, express-session, and bcrypt-nodejs; photo uploads via AWS S3; Ajax API routing; mLab database; deployed to Heroku
- Users can post needs, comment on others' needs, view a Leaflet map of all needs, and mark needs as resolved

xBooks: <https://xbooks-gt2018.herokuapp.com/>

- A library manager prototype created using Node, Express, Sequelize, GoogleBooks API, ESLint, and a variety of npm packages
- Allows users to search GoogleBooks API and save book data to a library page that displays the book cover image and title information

Multi-User Noise Manipulator: <https://haydest.github.io/noise-project/>

- Created using HTML, Materialize CSS, JavaScript, jQuery, the Web Audio API, AJAX, and Google Firebase
- Allows a user to create sound using an audio oscillator from the Web Audio API and listen to sounds created by other users by sending all mouse coordinate data of each live user to Firebase; upon disconnecting, a user's data is deleted
